**MAIL ORDER BINOCULAR & OPTIC REPAIRS**
**REASONABLY PRICED**
**telescope, rifle scope, microscope**

We repair all makes of binoculars and most other types of optics.
Most binocular purchases should last a lifetime. Save on unnecessary cost of replacement.....repairs are economical and cost effective.

Turnaround time from when we receive the binoculars until they are returned to you by insured mail is 2 weeks. The only exception to this is when the odd part proves difficult to acquire. Most optics can be repaired with the parts, tools and equipment we have on hand.

We recommend that binoculars are shipped to us wrapped in newspaper or bubble wrap and sealed in a properly addressed cardboard box.

The craftsman at Teka Services have 15 years of experience backing every job they do.

We pride ourselves on good communication with our customers and we encourage customers to communicate with us by phone, fax or email concerning estimates on repairs, cost of repairs and appraisal of optics.

We are always on the look-out for damaged optical equipment that is beyond repair for salvage purposes.

## YUGOSLAV MAUSER RIFLES

All of these fine rifles were manufactured at the world famous Zastava Arsenal in Krgujevac, Yugoslavia.

Depending on the model, they were produced in the 1940s and 1950s to very exacting specifications. These are possibly the last of the fine Mauser pattern rifles available anywhere in the world.

All are chambered for the widely available 7.92mm Mauser (8mm Mauser) cartridge.

See the ammunition section of our catalog for top quality ball cartridges for these guns.

**ALL rifles offered come with bayonet, sheath, frog, sling, cleaning kit and leather ammunition pouches.**

**ALL rifles are fully matching and in original condition unless otherwise noted.**

The serial number on the bayonet may not match the rifle unless noted. Condition will be the same as the rifle(s) ordered.

**The M-24** and it's variations; This model is identical to it's Czech cousin which bears the same model number. The early units (M-1924) were produced by FN in Belgium with all later production being done by Zasatava. All have the Coat of Arms of the former Yugoslavia on the receiver.

We offer the M-24, M-24/47 and the M-24/52 so be certain to specify when ordering.

**Always refer to the part number when ordering. This will simplify the ordering process and ensure the accuracy of your order.**

Be sure to tell us if you prefer the early model (long) bayonet or the later (short) edition.

# .BLUEING SERVICES.

Marstar now offers top quality blueing services using the world famous Du-Lite Black Oxide process, the very same system that's used by most of the major American manufacturers today.

We provide top quality refinishing of most types of rifles, shotguns and handguns. It should be noted that side by side as well as over and under shotguns will be quoted on a case by case basis due to the large number of variables which must be considered.

**We also blue stainless steel,** that's right you can have us blue that favorite rifle or handgun of yours and retain all the advantages of the stainless steel while getting rid of the high reflective factor associated with it. This is not a coating but a true blueing finish.

You can simply ship us your firearm for refinishing. Our price includes a complete strip down, cleaning, refinishing, blueing and re-assembly and return shipping of your firearm to you.

On the other hand you may want to take advantage of the extra savings by stripping down your firearm and sending only the parts that require refinishing. We would be pleased to quote on an individual basis.

We would be happy to send you our general price list on request, simply phone, fax or E mail us at queries@marstar.ca Prices can vary according to the degree of surface preparation required.

## We offer several finishes;

1) *Fine satin matte finish*, this is our highest grade of non-reflective finishes, also the most durable we have produced.... Ideal for competition handguns and rifles.

2) *Hunter grade finish*, this is our "utility grade" finish, ideal for matching the original factory matte finish of your rifle or shotgun. A favorite with hunters and target shooters alike.

3) *De Luxe High Polish*, this tough durable finish is best suited for that special high grade sporting firearm that is starting to show it's age and requires refinishing.

Dealers and gunsmiths are welcome, trade discounts available.
